Abstract

The study conducted to know the Emotional Intelligence of Senior Secondary Students. To this purpose, 152 male and 148 female students who studying in class XI and XII were taken from two highschools of Aurangabad city. Emotional Intelligence measured by Mangal's Emotional IntelligenceScale developed by Dr. S.K. Mangal. Result indicates that Government private secondary school students differ significantly on emotional intelligence. The higher mean in favour of private secondary school students indicates that they have significantly higher emotional intelligence as compared to government secondary school students. Rural and urban secondary school students do not differ significantly on emotional intelligence. Secondary school boys and girls do not differ significantly on emotional intelligence.

Key words: *Emotional Intelligence Scale, Emotional Intelligence, SSS students.*
