### Abstract

The current study aims to understand the Pre-marital sexual anxiety among the Post graduate students. For present study the sample comprised of 100 students (50 males and 50 females) from the Periyar University, Salem. In this study, the age limit is 19 to 25 years old. The tool used for this study was Pre-marital Sexual Anxiety Scale .It was developed by Pramod Kumar, Sardar Patel University. There are 16 questions and four alternatives are given for each question. This scale is used to understand four dimensions (sexual potency, sexual inhibition, sexual attractiveness, and sexual monotony).The t-test will be used for analyzing the data. The results show that there will be a significant difference in Pre-marital sexual anxiety between male and female.
